airtel

SYNC

AIRTEL SYNC 2026 · TRACK A · PROJECT UDYAM DIGITAL

Your business online, *in one sitting.*

A phone-first advisor, one transparent price, 30-second KYC and a live tracker for India's MSMEs, in their own language.

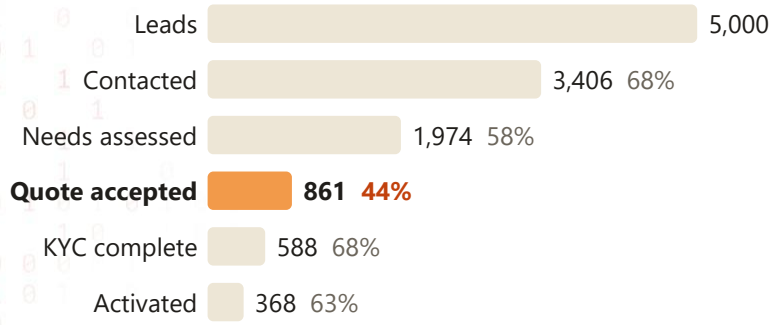

Team Kernel
Thapar Institute of Engineering & Technology (TIET)

Platform Partner unstop

Only 7.4% activate: the funnel leaks *at the quote* and at the door

FUNNEL, APR–JUN 2026 · % OF PREVIOUS STAGE

Quote-stage drops: price too high 414 · competitor cheaper 207 · too complex 206 · too slow 179.
GSTIN matters: 9.6% activate with one vs 2.0% without.

17.6 days

lead → activation; install alone takes 10–14 days

₹20k vs ₹2.5k

cost to win a micro shop vs its monthly bundle: field sales loses money

6% → 28%

6-month churn at 1 vs 5 "where is my order?" calls (3 on average)

68 of 368

past activations broke a catalogue or GST rule (22 on cancelled GSTINs)

TODAY'S JOURNEY

Rep visits, pitches this month's target › 3–5 days for a PDF of product codes › KYC on paper or email › 10–14 day install, 3–4 chase calls › Separate bills and helplines per product

Lead with professional offices; serve micro shops *without a visit*

1 · BEACHHEAD

Professional offices

25% of base · clinics, CA firms
11.1% conversion · ₹10.7k CAC

Channel: 100% self-serve

Biz Fibre 300
Cloud Email ×5 + Backup 1 TB
Endpoint Security ×5

₹4,712 /mo incl. GST

12-month price from the rules engine
₹4,198 on 24 mo · ready in 5 days

2 · VOLUME

Micro retail & services

55% of base · kirana, salon
4.1% conversion · ₹20.0k CAC

Channel: Self-serve + partner assist

Biz Fibre 100 + Postpaid 299
Cloud POS + WhatsApp Starter
No GSTIN: Fibre 100 + POS, ₹2,476

₹4,440 /mo incl. GST

12-month price from the rules engine
₹3,791 on 24 mo · ready in 5 days

3 · VALUE

Small multi-site

15% of base · 3–10 outlets
11.0% conv. · ₹28k median bill

Channel: Advisor → field sales

Per site: Fibre 300 + failover
SD-WAN + CCTV + POS
One bill for 4 outlets

₹34,904 /mo incl. GST

12-month price from the rules engine
₹32,780 on 24 mo · 24-mo term

4 · ASSISTED

Small manufacturers

5% of base · auto-parts, textile
12.8% conversion · 8.1% churn

Channel: Advisor → field / partner

Leased Line 100
Postpaid ×6 + Machine IoT ×5
Endpoint Security

₹49,357 /mo incl. GST

12-month price from the rules engine
₹48,384 on 24 mo · 24-mo term

VS. THE ALTERNATIVES AN OWNER HAS TODAY

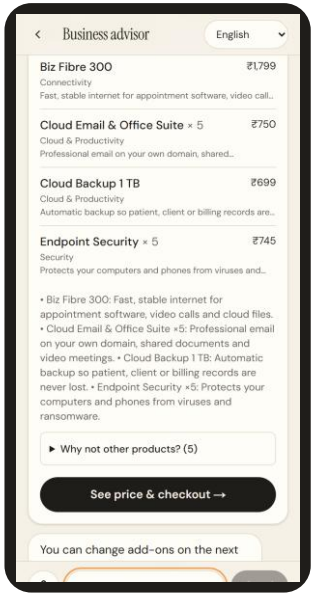

Local reseller
Cheap, nearby; one product each, no single bill or support number

Single-product digital sign-up
Instant, but one product, no advice, no bundle or GST-aware KYC

Accel field sales (today)
Advice, but 17.6 days, ₹15k per activation, 3 chase calls

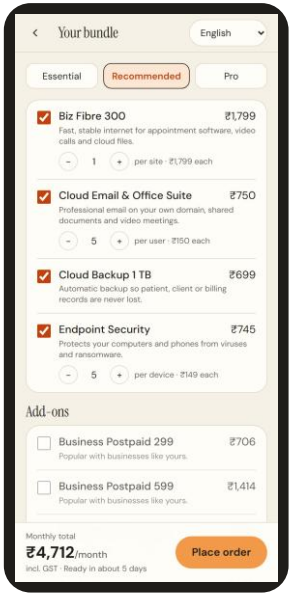

Udyam Digital
Advice + bundle + one bill, priced instantly on a phone, in 10 languages

One sitting on a phone: *advise, price, verify, track*

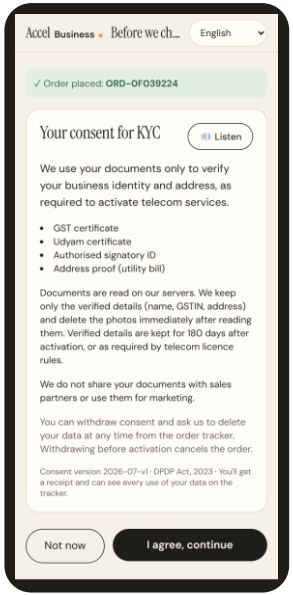

01 Advise

10 languages, voice and WhatsApp. Asks only what's missing (3 turns on average); the rules engine picks the bundle.

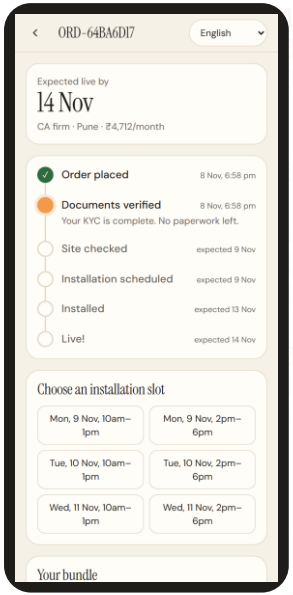

02 Price

One GST-inclusive monthly price. Toggle add-ons and 12/24/36 months; re-priced live, re-validated on order.

03 Verify

DPDP consent read aloud, then a receipt. GSTIN lookup, OCR, DigiLocker and e-Sign; 12 of 12 specimen verdicts right.

04 Track

Dated stages from install times, a self-booked slot and WhatsApp updates instead of chase calls. One bill after.

The LLM talks, code decides, and the field gets *a better brief*

N1 Fact guard

Every LLM sentence is checked against the engine's output. An untraced ₹ amount, product or "discount" falls back to the template, so the 15 live judge scenarios can't see a made-up price.

After MEGHA (Harvard AI for Good 2025, 1st) and Padhai Check (MumbaiHacks 2025): answers checked against a source of truth.

N2 Data passbook

Consent receipt with a SHA-256 of the exact notice, listen-aloud consent, and a log of every access to the owner's KYC data. Zero photos stored; one tap withdraws.

After Sahamati's multilingual consent bot and Skippers (Gen AI Exchange 2025): privacy you can see.

N3 Recovery playbook

Each lost lead gets an engine-priced offer and a call brief in the owner's language: 36-month re-quote for price drops, DigiLocker for KYC drops, AirFiber where fibre can't reach.

After DreamOps (Warpspeed 2025, grand prize) and PitchLense (Gen AI Exchange 2025): the agent prepares, a human closes.

FIELD FORCE AND PARTNERS: DIGITAL FEEDS THEM, NOT REPLACES THEM

Field sales: multi-site (6+ outlets) and manufacturers, with the advisor's profile and brief.
Channel partners: micro shops via partner mode on the owner's phone; partner keeps credit.
Telesales: everyone else, ranked by a propensity model (hold-out AUC 0.73).
Self-serve absorbs ~1,950 leads lost to unreachable numbers and unscheduled visits.

A REAL BRIEF FROM THE BACK-OFFICE

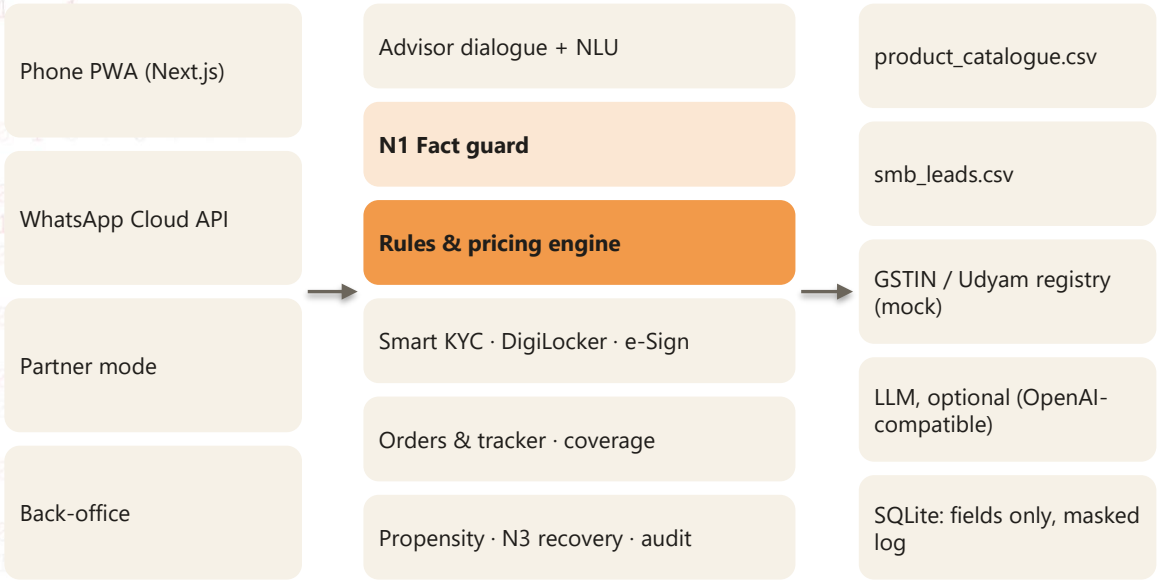

CA firm, Pune · saw offer, didn't buy · score 62

Re-quote on a 36-month contract: same bundle at ₹3,679/month incl. GST, ₹1,033 less than the 12-month quote.

Priced by the engine, so a rep can't promise a price the rules wouldn't give.

Architecture and privacy, *by design*

Principle: the LLM talks, deterministic code decides price, eligibility and KYC verdicts

DPDP Act 2023, built in

Consent you can prove: receipt with notice hash, purpose, retention date.

Purpose-limited: KYC only; never shared with partners or used for marketing.

Minimised: GSTIN pre-fill and DigiLocker; raw images never stored.

Masked: GSTIN, Udyam and ID numbers in UI, API and logs.

Transparent: owner sees every access; one tap withdraws and deletes.

Accurate: checksum, registry status, cross-document and 90-day checks.

AI-safe: the LLM never sets price or eligibility; the fact guard logs every blocked reply.

Conservatively, activations double and cost per activation *falls 64%*

Metric	Today	Simulated*	Target
Lead → activation	7.4%	15.6%	≥ 12%
Cost per activation	₹15,053	₹5,499	≤ ₹6,000
Days to activate	17.6	8.6	≤ 9
Status chases / customer	3.0	2.0	≤ 1
6-month churn	15.2%	14.3%	≤ 10%

*Impact simulator, conservative preset: each fix recovers a share of the exact drop reasons in smb_leads.csv; recovered leads then convert at today's later-stage rates. Cohort ARR ₹18.5 cr → ₹39.6 cr per quarter of leads.

Ask: a 3-month pilot with professional offices in Pune and Bengaluru, gated on ≥ 12% conversion and ≤ ₹6k CAC.

Rollout

0–3 mo — Pilot: professional offices, 2 tier-1 cities, web + WhatsApp, real GSTN via a GSP, DigiLocker.

3–9 mo — Scale: micro via 200 channel partners on partner mode; Hindi + 4 regional languages; UPI AutoPay.

6–12 mo — Assist: multi-site and manufacturers; advisor qualifies, field closes with the brief.

Risks we designed for

Wrong price live → engine decides; fact guard; 16 QA scenarios in CI.

KYC fraud → DigiLocker first; checksum, registry status, cross-document checks.

Channel conflict → partner attribution; human-only segments; briefs feed the field.

No fibre → PIN check re-plans to 5G AirFiber (2-day install).
